

Conference Cloth

The double sided and single sided Conference Cloths are machine washable. The following precautions should be taken to achieve the maximum fabric life and benefit from the product.

Wash on a gentle or short blanket wash cycle, using a mild or neutral detergent (without optical brightening agents), at a maximum temperature of 30°C.

Do NOT use bleach or strong alkaline detergents

Use a short spin cycle

Tumble dry at LOW temperature and remove from the tumble dryer and fold IMMEDIATELY when dry.

To avoid creasing, fold the table cover neatly and carefully whilst warm from the tumble dryer. If dried naturally the cover should be folded and stored when dry.

Note:

All materials undergo some slight 'relaxation' shrinkage when washed or dry cleaned. This is a natural sequence of the cleaning process and is unavoidable.

Excessive heat and mechanical action in both the washing and tumble drying may cause some additional shrinkage and delamination of the bonded materials.

Careful adherence to these washing and care instructions will ensure a prolonged life from the product
